				0000 Moored starboard North Navy Pier, San Diego, California	
				<p>New Year's Day Poem</p> <p>"0000 The ship's bell sounds twelve ever so clear; For midnight of nineteen-sixty is here; The ship is awake to wish good cheer; To all our shipmates for the coming year. How are we starting? Well lend me your ear; Moored starboard side to the North Navy Pier; We're at San Diego - in the bay, you hear; And with a good crew from both far and near.</p>	
1960	January	1	North Navy Pier, San Diego	<p>Ships and units of the Pacific Fleet in sight; Yard and District craft are also here to light; The Air Station has COMFIRSTFLT - that's right; For he is SOPA, in San Diego, this night. Our lines are all doubled and snug on their bight; Two wires are run all proper and right; The hatches are covered with canvas so tight; The ship is secure for the windy winter night.</p> <p>Fires are lighted under Boiler Number Two; Cooking away at its watery brew; The power is supplied on the <i>San Ju Ni Maru</i>; By number three generator running so true. But for the shower, scuttlebutt, and stew; The fresh water from ashore must do; And to connect the world with the crew; We thank our host for a telephone too."</p> <p>Signed, R.A. Schnepfer, LTJG, USN</p>	Deck Log Book, USS Calvert, January, 1960

The first is a replica of the ship's patch which I designed in early 1960 and was eventually approved by Commander-in-Chief, U.S. Pacific Fleet. I never did get a plaque with the insignia. The first time I saw one was in the Pentagon on a wall directly across the hall from the Chief of Naval Operation's office. Wonder if it is still there. The current CNO, Admiral J. M. "Mike" Boorda, was my Gunnery Officer when I was XO of JOHN . CRAIG (DD-885) in 1965-1966.

But back to the insignia. The upper left and lower right quadrants are composed of the paly of Calvert (the black and gold) and the cross of Westmoreland. They, obviously, were taken from the Maryland state flag. The upper right quadrant is a replica of the Navy Unit Commendation you and your shipmates earned in World War II. The lower left quadrant depicts the Amphibious Assault Insignia which was developed in the mid- to late 1950s and is awarded to amphibious ships based on excellence in a series of highly competitive amphibious exercises. CALVERT was awarded it for the first time on 28 December 1959. The ship's insignia is technically illegal in that the directives then in effect prohibited the use of any decoration in ship's insignia. That rule came into effect somewhere during the design process. I explained it to the CO, Captain Bill Kaufman, and he said submit it anyway and let's see what happens. Apparently the people on CINCPACFLT's staff could read their own instructions. Some things never change over the

				<u>Assault Troops To Hit Beach In Exercise.</u>	
1960	August	12	Camp Pendleton	"Marine riflemen and naval midshipmen will hit White Beach at Camp Pendleton as an assault unit tomorrow morning in an amphibious training exercise. Troops and middies will come ashore in landing craft and helicopters to take the beachhead and inland objectives. The joint operation is part of the indoctrination and summer training the future officers receive in amphibious tactics. The 550 midshipmen are enrolled in the Naval Reserve Officers Training Corps at 25 western colleges and universities. They are joining First Battalion Troops of the Third Marines for this exercise. Capt. M.A. Shellabarger, commander of Amphibious Squadron Five, will head the amphibious attack group of eight assault ships including the helicopter carrier Princeton."	San Diego Union.
